Product Overview

Advanced Hygiene Solution for Soft Surfaces

This handheld mattress and upholstery cleaner is engineered to maintain a hygienic sleeping environment by effectively removing dust mites, allergens, and debris. It utilizes a vibrating beater bar operating at 2500 rotations per minute to loosen particles deep within fabrics, while an integrated UV light system works to eliminate bacteria and germs. Designed for versatility, this compact device is suitable for a wide range of fabric items including bedding, sofas, pillows, and curtains.
