

Handheld Metal Detector with Adjustable Sensitivity

This handheld metal detector offers adjustable sensitivity for detecting ferrous and non-ferrous metals. It features LED, light, sound, and vibration alarm modes.

Product Overview

High-Performance Handheld Metal Detection

This professional-grade handheld metal detector offers high sensitivity and stable performance in a lightweight, ergonomic design. Engineered for versatile security applications, it features both sound and vibration alarm modes for quiet or noisy environments. The device ensures rapid, accurate screening with adjustable sensitivity, making it an ideal choice for airports, public security, and controlled access points.

Performance

Detection Sensitivity

60 mm

1 Coin Detection Distance

8 cm

Max Detection Range (50 cent coin)

Alarm Modes

Sound, Vibration, LED Indicator

Design and Operation

Key Operational Features

- Automatic tuning upon power-up
- One-handed convenient operation
- Adjustable sensitivity levels
- Optional earphone output
- Low battery consumption

Build Quality

Durable Construction • Lightweight • Ergonomic

Application

Typical Applications

- Airport Security
- Public Transport Hubs
- Border Control
- Conferences and Public Events
- Correctional Facilities
