

Handheld Personal Cooling Fan

This compact handheld fan is designed for personal cooling. It features a high-speed motor and durable plastic construction.

Product Overview

Compact Personal Cooling Solution

The FP-01 is a compact and lightweight handheld electric fan engineered for efficient personal cooling on the go. Designed with ergonomics in mind, it features a comfortable grip and a high-speed motor that delivers a focused, refreshing stream of air. Its durable plastic construction and battery-powered portability make it an ideal companion for outdoor activities, travel, and daily use in hot environments.
