

Handheld Pipe Cutter

This pipe cutter is designed for cutting various types of pipes, including PVC, CPVC, PPR, PEX, and polyethylene. It features a sharp, durable blade made of high-carbon steel for clean and precise cuts.

Product Overview

Professional Handheld Pipe Cutter

This professional-grade handheld pipe cutter is engineered for precision and efficiency, featuring an instant release mechanism that ensures clean cuts without deforming or crushing the pipe. Designed for versatility, it is suitable for a wide range of plastic piping materials including PVC, PP, PE, and multi-layer pipes. The V-edge blade geometry significantly reduces cutting force, while the ergonomic design facilitates smooth, burr-free operations.

Technical Specifications

Maximum Pipe Capacity

1.625 in

Max Outer Diameter

Compatible Materials	PVC, PP, PE, Multi-layer Pipes
Blade Characteristics	Stainless steel V-edge blade
Replaceable Blade	Yes

Features

Key Operational Features

- Instant release mechanism
- Non-deforming cut technology
- V-edge blade for reduced cutting force
- Ergonomic handle for leverage
