

Handheld Tube Flaring Tool

This professional-grade flaring tool creates precise flares on various types of tubing. Its hardened steel flaring cone ensures accurate and consistent flare formation, making it suitable for HVAC, plumbing, and automotive applications.

Product Overview

Professional Handheld Tube Flaring Tool

This professional-grade flaring tool is engineered for creating precise, consistent 45-degree flares on copper, aluminum, and brass tubing. Designed with a screw-type feed mechanism, it allows for fast and easy operation, even in close quarters where space is limited. Its lightweight, compact construction ensures portability and ease of use across HVAC, plumbing, and automotive applications.

Key Features

Design Highlights

- Screw-type feed mechanism
- Compact design for close quarters
- Lightweight construction
- Adjustable pipe sizing

Technical Specifications

Primary Applications

HVAC • Plumbing • Automotive

Flare Angle	45 degrees
Compatible Materials	Copper, Aluminum, Brass
