

Hands-Free LED Headlamp

This head-mounted lighting device offers hands-free illumination for a variety of applications. It features an adjustable head strap and a rear-mounted battery pack.

Product Overview

Professional Hands-Free Illumination

This high-intensity head-mounted lighting device is engineered for demanding environments requiring reliable hands-free operation. Utilizing an advanced reflector-based optical system, it delivers a consistent and focused light output suitable for industrial and outdoor tasks. Designed with an adjustable head strap and a balanced rear-mounted battery configuration, it provides long-lasting comfort and performance for mining, search and rescue, and camping operations.

Technical Specifications

Primary Applications	Mining, Search and Rescue, Camping, Industrial
Optical System	Reflector-based focus system

Design and Ergonomics

Wearability Features

- Adjustable head strap for secure fit
- Balanced rear-mounted battery pack
- Hands-free operational design
