

Hanging Infrared Gazebo Heater

This hanging gazebo heater is designed for outdoor use. It features a dome-shaped reflector to direct heat downwards and includes a chain for hanging and a pull cord for operation.

Overview

Efficient Outdoor Heating Solution

This hanging infrared gazebo heater is designed to provide targeted warmth for outdoor seating areas. Featuring a dome-shaped reflector, it efficiently directs heat downwards to ensure comfort in open-air environments. The unit is equipped with a convenient pull cord for easy operation and includes a hanging chain for simple installation in gazebos or covered patios.
