

Hard Floor Steam Mop

This steam mop is designed for efficiently cleaning hard floors using steam. Its compact design ensures easy maneuverability and storage.

Product Overview

High-Efficiency Steam Cleaning

This hard floor steam mop is designed for rapid, hygienic cleaning of various sealed floor surfaces, including ceramic tile and hardwood. It features a fast-heating system that generates 100°C steam to effectively loosen dirt and grime without the need for harsh chemicals. With an adjustable aluminum alloy stem and specialized cleaning attachments, it offers both ergonomic comfort and versatile functionality for thorough home maintenance.
