

Hardened Steel Angle Square Set

This set includes two steel squares designed for precision measurements and layout work. Constructed from hardened steel, these squares feature dual measurement scales in both metric and imperial units.

Product Overview

Precision Measurement Set

This hardened steel angle square set is engineered for high-precision layout work and measurements in professional environments. Constructed from tempered steel for enhanced durability, the squares feature dual measurement scales in both metric and imperial units. This versatile set includes two different sizes, making it an essential tool for metalworking, woodworking, and general construction projects.

Technical Specifications

Primary Applications

- Woodworking
- Metalworking
- General Construction
- Precision Layout

Material	Hardened Tempered Steel
Finish	Yellow paint
Measurement Scales	Metric, Imperial

Set Composition

Set Includes

- 1x Large Angle Square
- 1x Small Angle Square
