

Hardened Steel Pry Bar

This heavy-duty pry bar is designed for prying, demolition, and general leverage tasks. Constructed from hardened steel, it features a flattened chisel end for easy insertion and a pointed end for concentrated force.

Product Overview

Heavy-Duty Hardened Steel Pry Bar

This professional-grade pry bar is engineered for demanding tasks including demolition, prying, and general leverage applications. Constructed from high-strength hardened steel, it ensures durability and resistance to bending under pressure. The tool features a versatile dual-end design with a flattened chisel tip for easy insertion and a pointed end for concentrated force, making it an essential asset for construction and renovation sites.

Technical Specifications

Material	Hardened Steel
Surface Finish	Blue painted finish
Corrosion Resistant	Yes

Features

Key Features

- Flattened chisel end for easy insertion
- Pointed end for concentrated force
- High-visibility blue finish
- Heavy-duty construction

Applications

Suitable Applications	Construction, Renovation, Demolition, Emergency Services
