

Hardened Steel Screwdriver Bit Set

This set includes multiple Phillips head bits and other specialized bits for various screw head designs. Each bit ensures secure engagement and efficient torque transfer for reliable performance.

Product Overview

Industrial Precision Engineering

This hardened steel screwdriver bit set is designed for high-precision applications in the electronics, mobile phone, and clock repair industries. Manufactured with over 20 years of technical expertise, these industrial-grade bits offer exceptional durability and reliable torque transfer. The set is engineered to meet the demanding requirements of professional repair technicians and precision assembly environments.

Technical Specifications

Key Performance Indicators

20 years

Years of Manufacturing Refinement

Material Composition	Hardened Steel
Primary Applications	Mobile Phone Repair, Clock Repair, Eyeglass Repair, Precision Electronics

Compatibility

Included Drive Types

- Phillips Head
- Specialized Precision Profiles

Quality Assurance

Certifications & Quality

Industrial Grade • High Precision • Imported Inspection Equipment
