

Harvester Bar with Solid Sprocket Nose

This harvester bar features a solid sprocket nose for enhanced durability. Designed for professional forestry applications, this bar ensures smooth chain operation and precise cutting.

Product Overview

High-Performance Harvester Bar

This harvester bar features a durable solid sprocket nose design engineered to provide enhanced longevity and minimized friction during operation. It is specifically built for professional forestry environments, ensuring precise cutting performance and smooth chain movement. Its robust construction allows it to withstand the demanding conditions typical of large-scale harvesting operations.

Technical Specifications

Component Type	Solid Sprocket Nose Harvester Bar
Material Composition	Titanium Reinforced
Bar Length	80 cm

Usage Information

Recommended Applications

- Professional Forestry
- Harvesting Operations
