

# HCS Circular Saw Blade for Oscillating Multi-Tools

High carbon steel circular saw blade designed for multi-tool oscillating tools. The blade's circular design allows for plunge cuts and precise trimming in various materials, ideal for cutting wood and plastic.

## ADDITIONAL IMAGES

## Product Overview

### High Carbon Steel Circular Saw Blade

This circular saw blade is engineered for use with oscillating multi-tools, providing precision and versatility for various cutting tasks. Constructed from high carbon steel, it offers the necessary durability for effective material removal. Its design is specifically optimized for making plunge cuts and precise trimming in wood and plastic materials.

## Technical Specifications

### Available Sizes

Model Number	Diameter
437013	87
437015	80

Material	High Carbon Steel (HCS)
Compatible Materials	Wood, Plastic

## Compatibility & Usage

### Primary Applications

- Plunge cuts
- Precise trimming
- Material removal

Tool Compatibility	Oscillating Multi-Tools
Interface	Universal
