

HD DVB-S2 Satellite Receiver with Component Video

This is a high-definition DVB-S2 satellite receiver. It is equipped with a TV SCART connector, component video outputs (YPbPr), Ethernet port, USB 2.0 port, and HDMI output.

Overview

High-Definition Satellite Reception

This HD DVB-S2 satellite receiver is engineered to deliver high-quality digital television signals to compatible displays. Featuring a robust Linux-based operating system, it offers versatile connectivity options including HDMI, component, and composite video outputs. Designed for professional and home entertainment setups, it ensures reliable signal decoding and broad compatibility with modern AV equipment.

Connectivity

Data & Network Ports

- Ethernet Port
- USB 2.0 Port
- Dual Tuner Inputs

Video Output Interfaces

HDMI, Component Video (YPbPr), Composite Video (CVBS), TV SCART
