

HDMI USB Touchscreen KVM Extender 150m

This HDMI KVM extender transmits video, keyboard, mouse, speaker, and IR signals over a CAT-UTP cable up to 150 meters, supporting 1080P resolution. It facilitates touchscreen functionality.

Overview

High-Performance KVM Extension

This HDMI KVM Extender is designed to transmit high-quality video, keyboard, mouse, speaker, and IR signals over long distances using a standard CAT-UTP cable. Supporting resolutions up to 1080P, it ensures clear visual output for remote displays. The inclusion of USB connectivity enables seamless touch-screen functionality and peripheral device control, making it an ideal solution for interactive displays, digital signage, and industrial control environments.

Technical Specifications

Maximum Extension Distance	150 m
Maximum Resolution	1080P
Supported Signals	HDMI, USB, Keyboard, Mouse, Speaker, IR
Transmission Cable	CAT-UTP

Features

Key Features

- Touch-screen support
- Remote peripheral control
- Network hub functionality
- Long-distance signal transmission

Applications

Recommended Applications

Digital Signage • Interactive Displays • Industrial Control Systems
