

Head-Mounted Torch and Flashlight System

This head-mounted system provides hands-free illumination. It includes an adjustable head strap, a light module with a focused lens, and a rechargeable battery pack.

Product Overview

Versatile Hands-Free Illumination

The Head-Mounted Torch and Flashlight System provides reliable, high-intensity directional lighting for professional environments. Designed for maximum versatility, it functions as both a head-mounted light and a portable flashlight, ensuring hands-free operation when required. The complete kit includes a high-performance light module, a durable adjustable head strap, and an integrated rechargeable battery system for sustained professional use.
