

Heat Shrink Insulation Tape

This cross-linked tape provides electrical insulation and protection. It offers resistance to moisture, chemicals, and abrasion for use in harsh environments.

Product Overview

High-Performance Insulation Solution

This cross-linked heat-shrinkable insulation tape is engineered to provide superior electrical insulation and protection across diverse engineering applications. Designed to withstand harsh environments, the tape offers exceptional resistance to moisture, chemicals, and abrasion. Its flexible nature allows it to conform seamlessly to irregular shapes and surfaces, ensuring a tight and reliable seal for splicing, terminating, and cable repair.

Technical Specifications

Primary Applications

- Cable splicing
- Cable termination
- Wire repair
- Busbar insulation
- Electrical component protection

Compliance

Safety Standard Compliant • Reliability Tested

Material Characteristics

Cross-linked, Heat-shrinkable, Moisture-resistant, Chemical-resistant, Abrasion-resistant
