

Heat Shrinkable Cable End Cap

Used for sealing ends of power cables, lines and pipes. Hot melting adhesive provides a waterproof seal, protecting against humidity, UV radiation, and corrosion.

Product Overview

Cross-section illustration showing the adhesive coating and shrinkage process.

Reliable Cable Protection

These heat shrinkable end caps are designed for sealing the ends of power cables, lines, and pipes, providing a robust barrier against environmental hazards. Featuring a spiral hot-melting adhesive coating, they ensure superior waterproofing and moisture protection. Engineered for durability, these caps offer excellent UV resistance, corrosion resistance, and mechanical strength, making them ideal for demanding electrical and industrial applications.
