

# Heat Shrinkable Right Angle Boot for Cable Termination

Heat shrinkable right angle boots are used for medium voltage applications up to 36kV. They provide protection against flashover and surge.

## Product Overview

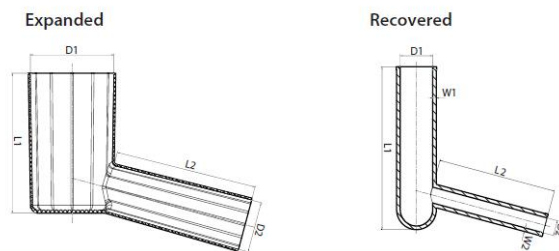

### Heat Shrinkable Right Angle Boot

This heat shrinkable right angle boot is engineered to provide superior electrical insulation and mechanical protection for cable terminations. Designed for medium voltage applications up to 36kV, it effectively protects against flashover and surge events. The material offers excellent UV and weather resistance, ensuring long-term reliability even in harsh outdoor environments.

## Performance & Features

Voltage Rating	36 kV
Operating Temperature	-40°C to +110°C
Color	Red
Key Features	Anti-tracking, UV Resistant, Weather Resistant, Excellent Insulation

## Dimensional Data

Technical diagram illustrating the dimensional changes of the boot during the heating process.

### Dimensions (MRAB-80/36-50/18)

Dimension	Expanded (mm)	Recovered (mm)
D1	80	36
D2	50	18
L1	100	110
L2	115	80
Wall Thickness (W1/W2)	3.8	3.8
