

Heat Shrinkable Right Angle Boot for Cable Termination

This heat shrinkable right angle boot is designed for cable termination and protection. It provides insulation and strain relief at right angle connections.

Product Overview

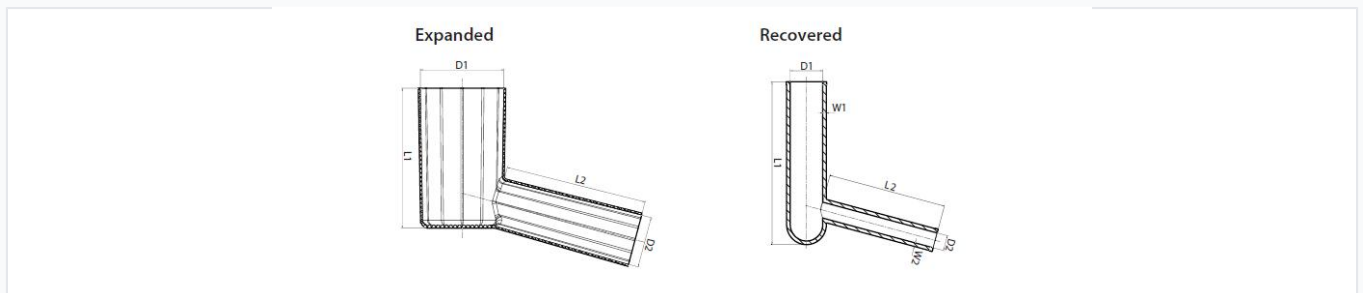

Heat Shrinkable Right Angle Boot

This heat shrinkable right angle boot is engineered for medium voltage cable terminations up to 36kV. It provides essential protection against flashover and electrical surges while offering superior insulation performance. Designed for durability, the material is UV and weather-resistant, making it suitable for harsh outdoor environments.

Technical Performance

Voltage Rating	36 kV
Operating Temperature	-40°C to +110°C
Material Properties	Anti-tracking, UV Resistant, Weather Resistant, Flame Retardant
Color Standard	Red

Dimensions

Technical Specifications (MRAB-80/36-50/18)

Dimension	Expanded (mm)	Recovered (mm)
D1	80	36
D2	50	18
L1	100	110
L2	115	80
W1	0	3.8
W2	0	3.8
