Product Overview

High-Precision Cutting Solution

This machine is a specialized high-precision laser cutting system designed specifically for heat transfer vinyl and similar materials. It integrates advanced galvo laser technology to ensure rapid, accurate cutting suitable for complex graphics and custom apparel designs. With its dual-functionality as both a laser cutter and a plotter, it excels at contour cutting and creating detailed, intricate patterns for signage and personalized applications.

Technical Capabilities

Applications

- Heat Transfer Vinyl (HTV)
- Apparel Decoration
- Custom Signage
- Personalized Gifts
- Intricate Pattern Cutting

Cutting Technology

Galvo Laser, Plotter Function, Contour Cutting

Operational Features

Usability Features

- User-friendly interface
- Advanced design software integration
- High-speed processing
