

Heated Towel Drying Rack

This electric towel rail is designed for bathroom use and constructed from stainless steel. It provides heated drying and warming for towels.

Overview

Efficient Bathroom Comfort

This electric towel rail is designed to elevate bathroom comfort by providing consistent heat for drying and warming towels. Constructed from durable stainless steel, it features a serpentine design with multiple horizontal bars to ensure efficient heat distribution. The unit is wall-mounted for space-saving convenience and includes an integrated heating element with a standard plug for straightforward installation.
