## ADDITIONAL IMAGES

## Product Overview

### Sophisticated Bathroom Comfort

This high-quality heated towel rail offers a perfect blend of functionality and modern design, ensuring your towels remain warm and dry. Constructed from durable mild steel with multiple horizontal bars, it provides efficient heat distribution for consistent performance. The unit is engineered for reliability, featuring specialized welding for enhanced structural integrity and sealing.

## Technical Specifications

### Dimensional Data

Attribute	Value
Model Code	AF-FI02001
Length	800 mm
Width	500 mm
Pipe Centers	450 mm
Depth	30 mm
Number of Tubes	7

### Heating Compatibility

Central Hydronic • Electric Heating

## Performance Metrics

### Thermal Output (EN442)

**241 Watt**  
Chrome Output

**305 Watt**  
White Output

## Material and Quality

### Finishing Options

- Chrome Plating (Cr 6+ / 3+)
- Powder Coating (Customized Colors)

### Certifications

ISO 9000, ISO 14001, SA8000, EN442 Standard
