Overview

Heavy Duty Adjustable Pallet Racking

This heavy-duty pallet racking system is engineered for efficient warehouse storage and organization. Constructed from high-strength cold-rolled steel, the system features a versatile, adjustable design that accommodates various pallet sizes and weights. With a powder-coated or galvanized finish, it ensures long-lasting durability and corrosion resistance in industrial environments.

Technical Specifications

Load Capacity per Beam Level

6000 kg
Max Load

Material	Cold-roll Steel Q235
Finish Options	Powder Coated, Galvanized

Dimensions

Standard Dimensions

Dimension	Range
Height	500 - 20,000 mm
Depth	400 - 1,500 mm
Length	1,000 - 4,000 mm

Components & Accessories

Available Accessories

- Horizontal & diagonal braces
- Row spacers
- Upright footplates
- Safety locking pins
- Post protectors (U-shape & L-shape)
- Frame barriers
- Pallet supporting bars
- Steel & plastic pallets
- Mesh containers & decks

Compliance & Logistics

Certifications

CE Approved

Typical Lead Time

Within 15 days

Shipping Terms

FOB, CFR, CIF, EXW
