

Heavy-Duty Agricultural Cultivator

This heavy-duty agricultural cultivator is designed for soil preparation. It features a robust frame with multiple shanks equipped with ground-engaging tools for tilling and loosening soil.

Product Overview

Heavy-Duty Agricultural Cultivator

This heavy-duty agricultural cultivator is engineered for professional soil preparation and land management. It features a robust frame equipped with multiple shanks and specialized ground-engaging tools designed to efficiently till and loosen soil. By improving soil aeration and structure, this implement helps create the ideal foundation for optimal crop growth across a variety of soil types.

Design & Construction

Ground-Engaging Tools

- Multiple shanks
- Tilling tools
- Loosening tools

Frame Construction

Heavy-duty, robust frame

Performance

Soil Compatibility

Various soil types

Primary Applications

Soil preparation, Tilling, Soil aeration, Land management
