

# Heavy Duty Air Hammer

This heavy-duty air hammer is designed for professional use. It features a forged steel head and a comfortable handle for optimal striking force and control.

## ADDITIONAL IMAGES

## Overview

### Professional Performance

This heavy-duty air hammer is engineered for demanding professional environments requiring consistent impact force. Designed with a focus on durability and control, it provides efficient operation for tasks ranging from demolition to metal shaping. The tool features a robust construction that ensures reliability during intensive use.

## Performance Metrics

### Blows Per Minute

**2100 BPM**

Impact Frequency

## Technical Specifications

Operating Pressure	6 bar
Air Consumption	113 L/min
Recommended Hose Size	3/8"
Air Inlet Size	1/4"

## Certifications

Compliance & Safety	TUV, Rheinland, Product Safety, Geprüfte Sicherheit
