

Heavy Duty Air Transporter Set

This heavy-duty air transporter set is designed for moving heavy loads. The set includes air transporters, hoses, and control units for industrial applications.

Product Overview

Industrial Air Bearing Transport System

This heavy-duty air transporter set is a versatile material handling solution designed for moving massive loads with precision and ease. Utilizing advanced air bearing technology, these systems create a frictionless surface that allows for effortless maneuvering in tight spaces while protecting delicate floor surfaces. Engineered for industrial environments, these transporters are ideal for cleanroom applications, offering superior ergonomics and safety for operators.

Technical Specifications

Standard Load Capacities

- 10
- 16
- 20
- 32
- 48
- 60

Common Industry Terms

Air Trailer, Air Caster, Air Load Module, Skate on Air, Air Bearing Kit, Air Dollies

Benefits

Key Advantages

Cleanroom Compatible • Ergonomic Design • Floor Protection • Tight Space Maneuverability • Frictionless Movement
