

Heavy-Duty Axle Assembly for Construction Machinery

This heavy-duty axle assembly is designed for loaders, excavators, and bulldozers. It features a rigid beam construction, providing exceptional strength and durability for demanding construction environments.

Overview

Heavy-Duty Axle Assembly

This heavy-duty axle assembly is engineered specifically for loaders, excavators, and bulldozers, providing exceptional strength and durability in demanding construction environments. Featuring a rigid beam construction, it ensures optimal load distribution and smooth operation for enhanced machine performance. The unit comes equipped with integrated hydraulic brake systems for reliable stopping power and precision control, along with mounting points designed for easy installation.

Technical Specifications

Construction Type	Rigid beam construction
Braking System	Integrated hydraulic brake system
Finish	Blue corrosion-resistant finish

Compatibility

Compatible Machinery	Loaders, Excavators, Bulldozers
----------------------	---------------------------------

Features

Key Features

- Rigid beam construction for durability
- Integrated hydraulic brakes
- Easy installation mounting points
- Corrosion-resistant finish
- Optimized load distribution
