

Heavy-Duty Axle Assembly for Construction Machinery

This heavy-duty axle assembly is designed for loaders, excavators, and bulldozers. The robust axle features a reinforced differential housing, high-strength axle shafts, and durable wheel hubs for reliable performance.

Product Overview

Heavy-Duty Axle Assembly

This heavy-duty axle assembly is engineered specifically for demanding construction environments, suitable for integration into loaders, excavators, and bulldozers. It features a reinforced differential housing, high-strength axle shafts, and durable wheel hubs to ensure reliable performance. Designed for optimal load-bearing capacity and efficient torque transmission, this component provides extended service life and robust power delivery for heavy machinery operations.

Technical Specifications

Key Features

- Reinforced differential housing
- High-strength axle shafts
- Durable wheel hubs
- High load-bearing capacity
- Efficient torque transmission

Compatible Machinery

Loaders, Excavators, Bulldozers
