

# Heavy-Duty Axle Assembly for Construction Vehicles

This heavy-duty axle assembly is designed for use in loaders, excavators, and bulldozers. It features robust construction with integrated brake drums, hydraulic brake actuators, and a central axle beam.

## Overview

### Heavy-Duty Construction Axle Assembly

This heavy-duty axle assembly is engineered specifically for demanding construction machinery, including loaders, excavators, and bulldozers. It features a robust construction designed to withstand extreme operational stress and harsh environments. The integrated design includes essential components such as brake drums and hydraulic brake actuators, ensuring reliable performance and safety in heavy-duty applications.

## Technical Specifications

### Key Components

- Integrated brake drums
- Hydraulic brake actuators
- Central axle beam

### Compatible Machinery

Loaders, Excavators, Bulldozers

## Performance

### Durability Focus

Heavy-Duty • Construction-Grade
