

Heavy Duty Bolt Cutter

This heavy-duty bolt cutter has hardened steel jaws designed for cutting bolts, rods, and other metal materials. Long handles provide increased leverage and cutting power.

Product Overview

Professional Grade Cutting Power

This heavy-duty bolt cutter is engineered for demanding industrial and construction environments. Featuring hardened steel jaws and precision-ground blades, it delivers clean, efficient cuts on bolts, rods, and various metal materials. The extended handle design provides superior leverage, reducing user effort while maximizing cutting force for consistent, long-lasting performance.

Technical Specifications

Ideal Applications

- Construction sites
- Industrial maintenance
- Security operations
- Metal rod cutting

Key Performance Metrics

1 High-Leverage
Cutting Action

Construction Material	Hardened Steel
Blade Characteristics	Precision-ground, Hardened, High-leverage
