

Heavy-Duty Booster Cables for Jump Starting

These heavy-duty booster cables are designed for jump-starting vehicles with discharged batteries. The color-coded clamps ensure easy identification and secure connections, while the durable, flexible insulation provides reliable performance in diverse weather conditions.

Product Overview

Professional Grade Jump-Starting Solution

These heavy-duty booster cables are engineered for reliable performance when jump-starting vehicles with discharged batteries. Featuring color-coded, secure-grip clamps, they ensure safe and efficient power transfer in various weather conditions. Designed for versatility, these cables are suitable for a wide range of applications, including cars, trucks, and other automotive vehicles.

Technical Specifications

Vehicle Compatibility

- Cars
- Trucks
- General Automotive

Performance Features

1 High

Optimal Contact

1 High

Weather Resistance

Clamp Design

Color-coded, Red (Positive), Black (Negative), Secure Grip

Insulation Material

Durable, flexible weather-resistant material
