

# Heavy-Duty Booster Cables for Jump Starting

Heavy-duty booster cables are engineered for jump-starting vehicles with dead batteries. They feature color-coded clamps and durable insulated cables ensuring safe, reliable connections and tangle-free storage.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Emergency Power

These heavy-duty booster cables are engineered for jump-starting vehicles with discharged batteries, ensuring you can get back on the road quickly. Designed for durability and safety, they feature insulated, color-coded clamps to prevent incorrect connections and ensure secure contact. The tangle-free cable construction allows for convenient storage and ease of use, making them an essential tool for cars, trucks, and SUVs.

## Technical Details

### Vehicle Compatibility

- Cars
- Trucks
- SUVs
- 12V Battery Systems

### Clamp Color Coding

Connection	Color
Positive	Red
Negative	Black

### Safety Features

Insulated Clamps, Color-Coded Polarity, Tangle-Free Design, Weather-Resistant
