

Heavy-Duty Cage Trailer for Trucks and Buses

This heavy-duty trailer is designed for transporting goods via trucks and buses. It features a robust frame, multiple axles, and a cage-like structure for secure cargo containment.

Product Overview

Robust Transport Solution

This heavy-duty cage trailer is specifically engineered for trucks and buses, providing a secure and reliable solution for logistics and transportation operations. The unit features a reinforced frame and multi-axle configuration to ensure stability under load. Designed for high-frequency use, it includes integrated access ladders and a rear security panel to protect cargo during transit.

Physical Construction

Design Features
