

Heavy-Duty Chain Hoist

This heavy-duty chain hoist is designed for lifting and moving heavy loads. It features a robust construction with high-strength alloy steel components for durability and safety.

Product Overview

Heavy-Duty Chain Hoist

This heavy-duty chain block is engineered for lifting and moving substantial loads with reliability. Constructed with high-strength alloy steel components, it ensures durability and safety in demanding environments. The hoist features a smooth and efficient gear system designed for easy operation and precise load control, making it an ideal choice for industrial, construction, and maintenance applications.

Certifications

Compliance & Standards

CE, GS

Model Number

4215

Construction

Key Features

- Robust construction
- Smooth gear system
- Precise load control

Material

High-strength alloy steel
