

Heavy-Duty Clutch Assembly

This heavy-duty clutch assembly features a robust, circular design. It is designed to optimize torque transfer and heat dissipation.

Product Overview

Heavy-Duty Clutch Assembly

This heavy-duty clutch assembly is engineered for demanding industrial applications requiring reliable torque transfer. Featuring a robust, circular design with multiple integrated friction elements, it is built to withstand high-stress environments. The unit includes a specialized multi-point contact system with raised pads and recessed sections to optimize both engagement performance and heat dissipation.

Technical Specifications

Design Features

- Robust circular chassis
- Integrated friction elements
- Multi-point contact system
- Heat dissipation geometry

Surface Coating	Red industrial coating
Application Suitability	Heavy-Duty, High-Performance, Industrial
