

Heavy-Duty Connecting Shackle

This heavy-duty shackle is designed for connecting and securing heavy loads. Its robust construction ensures reliable performance under demanding conditions, and the yellow pin provides a visual indicator of secure closure.

Product Overview

Industrial-Grade Connecting Solution

This heavy-duty connecting shackle is engineered for demanding industrial applications requiring secure load management. Featuring a robust, high-strength construction, it ensures reliable performance in rigorous environments. The distinct yellow pin serves as a critical visual indicator, allowing operators to quickly verify secure closure and maintain safety standards.

Technical Specifications

Component Details

- Black finished shackle body
- High-visibility yellow locking pin

Application Suitability

Load Securing • Heavy Lifting • Industrial Rigging

Design Features

Heavy-Duty, Industrial Grade, Visual Safety Indicator
