

Heavy-Duty Construction Loader

This heavy-duty loader is equipped with a robust hydraulic system and reinforced chassis. Its articulated design provides maneuverability for efficient material handling.

Product Overview

Heavy-Duty Construction Loader

This heavy-duty loading machine is engineered for demanding construction and engineering environments. It features a robust hydraulic system, a reinforced chassis, and an operator cabin designed for enhanced visibility and safety. With an articulated design for superior maneuverability and a powerful engine, it delivers efficient material handling and long-term reliability.

Technical Specifications

Key Performance Metrics

1 High

Engine Power

1 Articulated

Maneuverability

Model ID

G7808

Design Features

Articulated Design, Reinforced Chassis, Enhanced Visibility Cabin

Safety & Control

Control Systems

- Advanced control systems
- Operator safety cabin
- High-visibility design
