

Heavy-Duty Construction Machinery Attachment

This is a heavy-duty attachment for loaders, excavators, and bulldozers. It features durable steel construction with a T-handle and a three-pronged fork for efficient material handling.

Overview

Heavy-Duty Construction Machinery Attachment

This robust attachment is engineered for demanding construction, demolition, and landscaping applications. Featuring a durable steel construction, it is designed to integrate seamlessly with loaders, excavators, and bulldozers for enhanced operational efficiency. The unit includes a three-pronged fork for superior material handling and a T-handle design to ensure precise control and maneuverability during excavation tasks.

Technical Specifications

Key Design Features

- Three-pronged fork design
- T-handle for enhanced control
- Heavy-duty build

Construction Material

Durable Steel

Compatibility & Use

Application Areas

Construction • Demolition • Landscaping

Compatible Machinery

Loader, Excavator, Bulldozer
