

# Heavy-Duty Construction Machinery for Loading, Excavating, and Bulldozing

This heavy-duty machinery is designed for loading, excavating, and bulldozing applications. It features a robust frame, powerful engine, and efficient hydraulic system.

## Overview

### Versatile Heavy-Duty Construction Machinery

This robust heavy-duty machinery is engineered for demanding construction environments, offering multi-functional capabilities for loading, excavating, and bulldozing. Designed for high productivity and operational efficiency, the unit features a reinforced frame and a powerful engine to handle rigorous tasks. Operators benefit from an ergonomic cabin and advanced control systems, ensuring safety and comfort during extended work shifts.

## Key Metrics

Model	YL26
Primary Applications	Loading, Excavating, Bulldozing

## Technical Features

### Construction

Robust Frame • Heavy-Duty

### Control Systems

- Advanced hydraulic system
- Ergonomic operator cabin
- Advanced control interface
