

Heavy Duty D Size 1.5V Battery

These are heavy duty D size batteries with a voltage of 1.5V. The batteries are suitable for a wide range of applications, including toys, radios, and other electronic devices.

Overview

Reliable Power Solution

These heavy-duty D size batteries are engineered to deliver consistent 1.5V power for a variety of electronic devices. Designed for longevity and performance, they are an ideal choice for applications ranging from portable radios to toys. Their robust construction ensures reliable operation when you need it most.

Technical Specifications

Nominal Voltage

1.5 V Voltage

Battery Size	D (R20P / UM-1)
Battery Type	Heavy Duty

Compliance & Standards

Environmental Compliance

0% Mercury

Certifications	CE
-----------------------	----

Applications

Suitable Applications

- Portable Radios
- Toys
- Electronic Devices
