

Heavy Duty Dee Shackle

This heavy-duty dee shackle is designed for lifting and rigging applications. Manufactured from high-strength steel, this shackle conforms to BS3032 standards, ensuring reliability and safety.

Product Overview

Heavy Duty Dee Shackle

This heavy-duty dee shackle is engineered for demanding lifting and rigging applications across construction, marine, and industrial environments. Manufactured from high-strength steel, it provides a robust and dependable connection for various load-bearing tasks. The design features a reliable screw pin mechanism, ensuring secure closure while allowing for easy attachment and detachment.

Technical Standards

Standards Compliance

BS3032

Key Features

Design Features

- Screw pin closure mechanism
- High-strength steel construction
- Designed for heavy-duty lifting
- Suitable for rigging applications

Applications

Industries Served

Construction • Marine • Industrial
