

Heavy-Duty Demolition Hammer

This demolition hammer is a robust tool suited for heavy-duty demolition work. Its high-impact mechanism efficiently breaks through concrete, masonry, and asphalt.

Overview

Professional Heavy-Duty Demolition

This double-insulated handheld power tool is engineered for high-efficiency demolition in demanding construction environments. Powered by a single-phase series excitation motor, it offers a safe and reliable solution for breaking through concrete, masonry, and asphalt. Its ergonomic design and robust impact mechanism make it an essential tool for pipeline laying, interior decoration, and large-scale infrastructure projects.

Performance

Key Performance Metrics

1 Single
Phase

Technical Specifications

Motor Type	Single-phase series excitation motor
Insulation	Double-insulated
Safety & Compliance	Double Insulated, High Reliability, Ergonomic Design

Applications

Primary Operations

- Crushing
- Chiseling
- Digging
- Grooving
- Cutting

Compatible Materials

Concrete • Masonry • Asphalt

Target Industries

- Pipeline laying
- Mechanical installation
- Water supply and drainage construction
- Interior decoration
- Port facility construction

Equipment & Accessories

Compatible Accessories

- Picking drills
- Chisels
- Shoveling bits

Chuck System

Durable chuck system for secure bit retention and quick changes
