Overview

High-Performance Diesel Power

The MC13 is a heavy-duty diesel engine engineered for demanding commercial and industrial environments. It integrates advanced combustion technology with a high-pressure common rail fuel injection system to deliver optimal fuel efficiency and reduced emissions. Designed for durability and reliability, this engine ensures long-lasting performance and minimal maintenance requirements in rigorous operating conditions.

Technical Specifications

Performance Highlights

13 L

Engine Displacement Class

Key Engine Technologies

Turbocharged, Common Rail Injection, Electronic Engine Management, Advanced Combustion

Maintenance & Design

Design Advantages

- Robust construction for durability
- Compact design for flexible installation
- Easily accessible components for service
- Integrated diagnostic ports
- Effective cooling system with fan

Maintenance Profile

Low Maintenance • Extended Service Intervals • Service-Friendly
