

Heavy-Duty Door Closer with Adjustable Speed

This heavy-duty door closer is designed for high-traffic commercial applications. It features adjustable closing and latching speeds to provide optimal control.

Overview

Professional Door Control

This heavy-duty door closer is engineered for high-traffic commercial environments, offering reliable performance for both interior and exterior doors. It features a durable cast iron body with a full complement bearing to ensure smooth, long-lasting operation. With adjustable spring tension and speed controls, it provides precise closing and latching functionality to prevent slamming and ensure secure closure.
