

Heavy-Duty Electric Winch with Remote Control

This heavy-duty electric winch is designed for off-road vehicles, trucks, or trailers. It features a high-capacity steel cable, robust motor, and remote control for operation from a distance.

Product Overview

Professional Grade Pulling Power

The NHW15000 Heavy-Duty Electric Winch is engineered for demanding recovery and towing applications, suitable for off-road vehicles, heavy trucks, and trailers. This robust unit features a high-capacity steel cable system and a powerful motor-gearbox assembly designed for reliability under load. Complete with a remote control for safe, distant operation and essential hydraulic fittings, it provides a versatile solution for professional-grade pulling requirements.
