

Heavy-Duty Elevator Jack Stand

This heavy-duty elevator jack stand is designed for agricultural and construction machinery. It features robust steel construction with a black powder-coated finish for corrosion resistance and includes a wide base plate for stability.

Product Overview

Heavy-Duty Elevator Jack Stand

This heavy-duty elevator jack stand is engineered for demanding environments, specifically agricultural and construction machinery support. It features a robust steel construction with a black powder-coated finish to ensure long-term corrosion resistance. Designed with a wide base plate, it offers superior stability on uneven surfaces, while the adjustable height mechanism and secure locking pin provide precise leveling and safety for heavy equipment like cranes.

Physical Characteristics

Material	Robust Steel
Surface Finish	Black powder-coated
Key Features	Corrosion Resistant, Wide Base Plate, Adjustable Height

Safety & Usability

Safety Locking Pin	Yes
Adjustable Height	Yes

Applications

Compatible Equipment

- Agricultural Machinery
- Construction Machinery
- Cranes
- Heavy Equipment Support
