

Heavy-Duty Elevator Latch

This heavy-duty latch mechanism is designed for elevators and agricultural construction cranes. It is constructed from high-strength steel for durability and features a corrosion-resistant finish.

Product Overview

Heavy-Duty Elevator Latch

This heavy-duty latch mechanism is precision-engineered for agricultural construction cranes and elevators. It features a robust pivoting design that ensures reliable locking and unlocking performance in demanding industrial environments. Constructed from high-strength steel with a corrosion-resistant finish, this component is built for durability and long-lasting service life.

Technical Specifications

Material	High-strength steel
Surface Finish	Corrosion-resistant
Key Features	Heavy-duty, Pivoting design, Corrosion-resistant, High-strength

Applications

Suitable Applications

- Agricultural construction cranes
- Elevator systems
- General heavy-duty lifting equipment
