

Heavy-Duty Elevator Motor for Cranes

This elevator motor is designed for heavy-duty use in agricultural and construction machinery, especially cranes. The robust enclosure provides protection in harsh environments, ensuring reliable and efficient operation.

Product Overview

Robust Power for Demanding Applications

This heavy-duty elevator motor is engineered specifically for the rigorous demands of agricultural and construction machinery, particularly cranes. Featuring a reinforced enclosure, it provides exceptional protection against harsh environmental conditions, ensuring consistent performance in challenging outdoor or industrial settings. Designed for reliability and high efficiency, this motor is a dependable solution for lifting and heavy-load operations.

Technical Specifications

Protection Features

Robust Enclosure • Weather Resistant

Operational Focus

- High reliability
- Efficient power delivery
- Demanding application support

Primary Applications

Cranes, Agricultural Machinery, Construction Machinery, Heavy-Duty Lifting
