Overview

Heavy-Duty Coal Transport Solution

This heavy-duty enclosed coal transport trailer is engineered for the efficient and secure movement of coal and bulk materials. Featuring a robust, reinforced chassis and aerodynamic enclosed van body, it is built to withstand harsh mining and distribution environments. The design prioritizes stability and load distribution through a multi-axle system, ensuring compliance with road regulations while minimizing spillage risks.

Technical Specifications

Loading & Access

- Multiple vertical side doors
- Secure locking mechanisms
- Easy access for loading and unloading

Construction Features

Reinforced sidewalls, Fully enclosed cargo box, Corrosion-resistant coating, Reinforced vertical ribs

Performance & Safety

Safety Equipment

Rear bumper guards • Reflective markings • Rear lighting • Warning triangle

Stability & Efficiency

1 Multi-axle

Axle Configuration
